Conversion Formula
Multiply the number of grams you need to measure by the conversion factor to get the equivalent number of pounds (grams x 0.0022 = pounds).

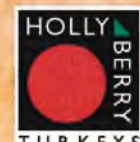

Example:
1500 grams x 0.0022 = 3.30 Lbs

*For Lb's conversion table opposite. **Oven Ready goal is calculated as a loss of 83% from the Liveweight goal.
The performance goals are an estimate of the results that can be achieved under TFF conditions. As performance can be affected by various factors existing in particular TFF operations, these goals cannot and should not be regarded as a form of guarantee.
